

Why are you most excited about your top-ranked team?*

Asking questions. The field of software engineering is very nuanced and I want to learn every detail by asking and learning from my top-ranked team at Figma.

Why do you want to join Figma?*

I'm drawn to Figma because it has transformed how teams create together. I've used Figma countless times in my own SWE projects and hackathons, where it helped my teams ideate and collaborate smoothly in real time. Therefore, I'd love the opportunity to learn Figma's inner workings and apply my skills in Python, C++, and full-stack development to help enhance the platform I already rely on.
